

34. (new): A microencapsulated catalyst-ligand system obtained by a process according to any one of Claims 13, 15 or 17.

REMARKS

The claims have been amended to improve dependency and to reduce the number of independent claims.

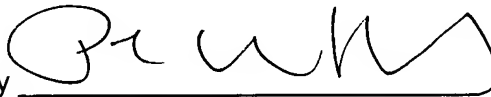

The matter added to claim 23 is taken from claims 19 and 20 so as to avoid multiple-dependent claims depending from multiple-dependent claims.

New claim 34 is drawn to the product of claims 13, 15 and 17 and is supported by the applicants' disclosure in the same way as claims 13, 15 and 17.

No new matter is presented with the foregoing claim changes.

Respectfully submitted,

MORGAN LEWIS & BOCKIUS LLP
